

SBV PHOTOGRAPHY

Senior Packages

Visit the studio for an hour glamour shot or bring some props for something fun. We will also go outside for another hour of on location portraits as well. Let's get creative and do something cool for your senior pics. SBV Photography can also add in backdrops in post production. Involved in several different sports? No problem. Example: Have one pose with soccer background and baseball backdrop too. The custom designed print can include your graduation year, school name, etc. Retouching is never extra.

Open House Invitations are all custom designed just like the Photo Books. A photographer's assistant will be on hand for on location shoots to help with posing and lighting.

After your [Premiere Night](#), all shots will be made available for online viewing and ordering at no charge. A great feature for out of town family members.

Showcase what you're into by bringing along a prop either for in studio or on location shots. Feel like going skating instead of getting these pictures taken? Let's do both. I'll capture you having fun and you will get some cool senior pictures at the same time.

Let's get you onto the soccer field with the net in the background. Get your senior year painted right onto the field in post production.

Have no idea what type of picture you want? That's okay, I keep a notebook full of cool ideas. Rest assured we won't do anything boring.

Every single shot will be available for proofing in person or online.

As a former and current student of photography and digital design, Steve Vansak can offer many types of collages and special effects.

Your Deluxe Hardbound Photo Book will include many design touches to suit the mood of the occasion. No two books are alike and are printed on premium coated paper. The cover images are printed directly on the hardbound covers. Ask to see samples.

Keep in mind that retouching will occur as part of the digital darkroom processing and does not cost extra.

Bring your glove and bat into the studio and have me place you into a scene. We can have your name inscribed onto the picture with the date or other info. Many different scenarios can be achieved so let's get creative.

Senior Pics don't just mean standing next to some blocks spelling out your graduation year.

Consider some of these ideas:

- Cars and Motorcycles (get beautiful shots of you in and around your prized machine).
- Urban Photography - take a trip into the city and make it your backdrop.
- Rural Photography - stand, lay, sit in the tall cornfields.
- The Beach - bring a couple of friends, have fun, get some cool shots.
- Virtual Backgrounds - pose on a high key background and then choose several other backgrounds to be placed into.
- Sports Fields, Tennis and Basketball courts, etc.
- Recreational Centers - miniature golf, go carts, batting cages, etc.

Photographer Steve Vansak loves to have fun at his sessions and always turns that up a notch for his Senior photography. "High School Senior sessions are some of my favorites. They are way into it and are up for anything. That inspires me to do different and creative things with their images" says Vansak. That holds true of the session itself and with what I do to the images afterwards.

"I shoot exclusively in the Digital Negative format so I can bring optimum image quality to each photograph. After every session, each digital negative is taken into the digital darkroom for processing. Your shots will receive color corrections, retouching, general clean up, and in some cases design work."
